

Database Information from EAK's ACIO records on File for MILAB and SSP dealings

ACIO Record of Russian/Israel MILAB and Secret Space Program Files:

1. In order to check the ACIO (Alien Contact Intelligence Organization) database record files, information that should be provided is knowing a person's full name in English and the original language from country of birth. Also full date of birth Month, day, and year.
2. Found 2000 records relating to EAK subjects Ukrainian, Russian, Israeli, Canadian and US files. There were many files on the subject's family history on Father's side.
3. At the age of 2-10 during the year 1987 was abducted by the Drazo black reptilians 14 feet tall, Sharab Invictus reptilians yellow 12 feet tall, and a tall man with grey skin, harvester humanoid looking being with black, red, grey long hair, and beard, 14 – 16 feet tall. The reptilians would be the ones to inject human children with femtites (femto + technites) = femtites which can manipulate nuclear energies and building atoms, as well as manipulating the energy of quarks, a quark is an elementary particle and a fundamental constituent of matter. Quarks combine to form composite particles called hadrons, the most stable of which are protons and neutrons, the components of atomic nuclei. For femtites you need the quarks from the atoms to make whatever atom you want and can alter DNA structures in a human body on the molecular as well as the subatomic level, blocking the natural cycle of psychic abilities within a growing human being, and also damaging the basic growth cycle of hormones. The subject EAK was injected with 36,000 femtites similar to (nanites nanomachines) which were transported into the blood stream and attacked the subjects nervous system, damaging the body and causing all types of auto immune disorders such as Hashimoto's Thyroiditis, Hemiplegic Migraines with paralysis, vitamin and nutrient deficiencies in the body, light sensitivity, cold sensitivity, sound sensitivity, and food intolerances. These femtites were designed to kill the subject by making her vulnerable to human viruses that attack the central nervous system and eventually erode the functions of the human body, with the potential of making the subject an invalid.

Size comparison of nanites and femtites:

Nano + technites = nanites (nano x10 (-9))

Femto + technites = femtites (femto x10 (-15))

Database Information from EAK's ACIO records on File for MILAB and SSP dealings

4. While lived in Ukraine as a child subject EAK, during 1989, participated in the Experimental Group 32 that was run by Andrey Sarnof and the Yakovlev biotech engineering and aircraft group doing genetic experiments by putting different types of drugs into the female subject to see how dormant psychic abilities could be stimulated and how they worked, femtites could not completely suppress subjects psychic abilities. The Experimental Group 32 was interested in how the subject's remote viewing abilities functioned.
5. In Israel during 1991 Alvin Sahan Toffer a neuro scientist ran brain testing experiments on the EAK subject seeing how the brain would function when the brains left and right hemispheres were polarized so the brain would function at full 100 % capacity in terms of being able to open natural time dilation portals organically, use levitation abilities, etc. Use visualizative meditation and mapping manifestation factors to create anything that the subject wished to see in the physical existence of reality in order to fully develop psionic abilities to 100 % capacity in order to be able to precognitively see the future. When a subject is able to manifest something on the physical plain of reality with their mind then they are able to also potentially have the capacity to change or alter timeline outcomes by literally manifesting a different timeline matrix destiny from what it was supposed to be thereby creating a whole new reality where the future looks nothing like the original timeline matrix system.
6. During 1995 to 1999 the subject EAK was put in a type of Monarch program somewhere near the Sierra Mountains in the woods near a remote cabin where the handlers would continually drown the subject underwater to see how long EAK could stay under the water and hold her breath. The water testing had something to do with adapting the human body to temporal space travel in anti-gravity environments for long distance space travel. As well was trained in withstanding torture and not feeling any pain or guilt when questioning other assets in programs. The not feeling pain was conditioning designed so the subject would be numb to pain factors and would not react to any type of pain, could withstand feeling pain stimuli and not break down when under stress or pressure. The Monarch projects dealt with trauma based mind control techniques, by trying to break down the subjects so they would have split and fractured multiple personality disorders or tricking the mind to think that orders could be implanted into memories so subjects would commit acts of terror, chaos, or harm others. It was noted that the EAK subject was stubborn and could not be easily influenced or swayed through mind control, would not retain any implanted mind control triggers, or orders that were implanted into the neo cortex of the subjects brain functions. There were three handlers who are brothers who were associated with the Monarch program, their names were Robert Miller, Johnathan Miller, and Jameson Miller. The three brothers were working for Monarch Solutions LTD. during the time that the conditioning experiments were being done.

Database Information from EAK's ACIO records on File for MILAB and SSP dealings

7. During 2000 participated in the quantum leap training program associated with one of the directors at CERN, named Paul Serene, who is in charge of the time travel concept training for assets being prepared for the time warp programs doing 50-60 years and back contracts. There are two CERN labs in the US that have mini hadron colliders in underground bases.
8. The EAK subject was in the Quantum Leap Temporal Program from 2001-2014. This program bends time and space so the subject exists in a somewhat alternative reality space time that is synced with the current reality so the subject could easily travel between both the alternative reality and the present reality. EAK did a 60 and back service contract with the quantum leap temporal program, the 60 years was done in the alternative reality with the ability to phase in and out of time, changing the time matrix of any reality where the subject ended up in.

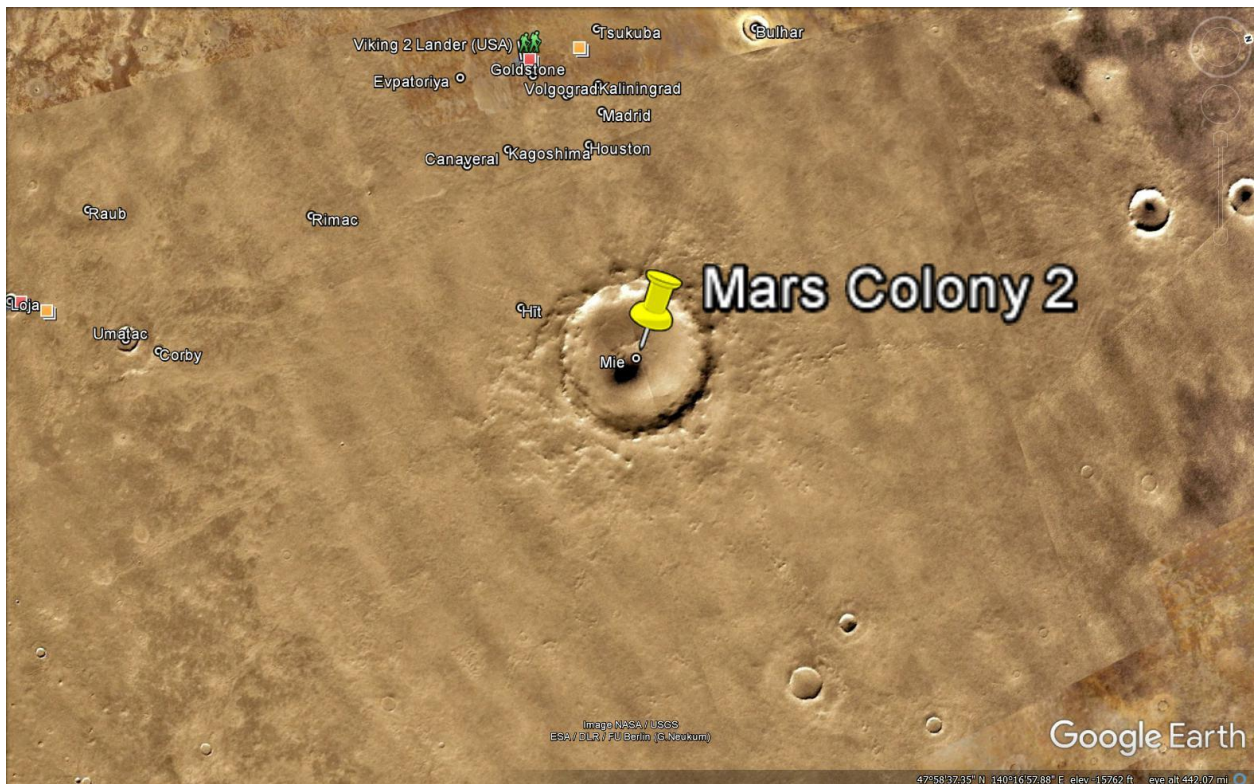

During the 2000's the EAK subject was stationed on eleven Mars ICC (Interplanetary Corporate Conglomerate) bases and also on some of the Moon SSP locations. The EAK subject saw various medical labs on the Mars ICC bases where human body parts were fused with cyborg technology, then a test subjects soul would be held in electrical containment, once the cyborg body was ready the soul would be transferred into the cyborg and after half a day of disorientation the subject's soul would adapt to the new cyborg body. Some of the ICC bases have meat labs where human body parts are used from unwilling subjects to be harvested with the cybernetic technology creating soldiers or scouts to be traded with other ET species. Both living and dead body parts are used for harvesting, there are technicians who monitor what type of DNA, body parts, and bones can be used for cyborg creation, only the best tissue matter is used for splicing with cybernetic technology. The ICC trades the cybernetically augmented soldiers and scouts with other advanced ET's for medical serums to stop diseases or end the aging process, receiving technology that is hundreds of years more advanced that they can implement for building better ships, colony facilities, weaponry, healing medical pods, etc. as well as gaining rights for more trading routes in space and access to planets where they can build their colonies.

There are ICC manufacturing plants on Mars and other planets in the Milky Way galaxy that build plasma bombs, cannons, and grenades, which can easily destroy cities, stations, or even planets. The plasma weaponry is often mounted on cloaked ICC ships that use stealth technology in order to approach planets, or stations before they are destroyed.

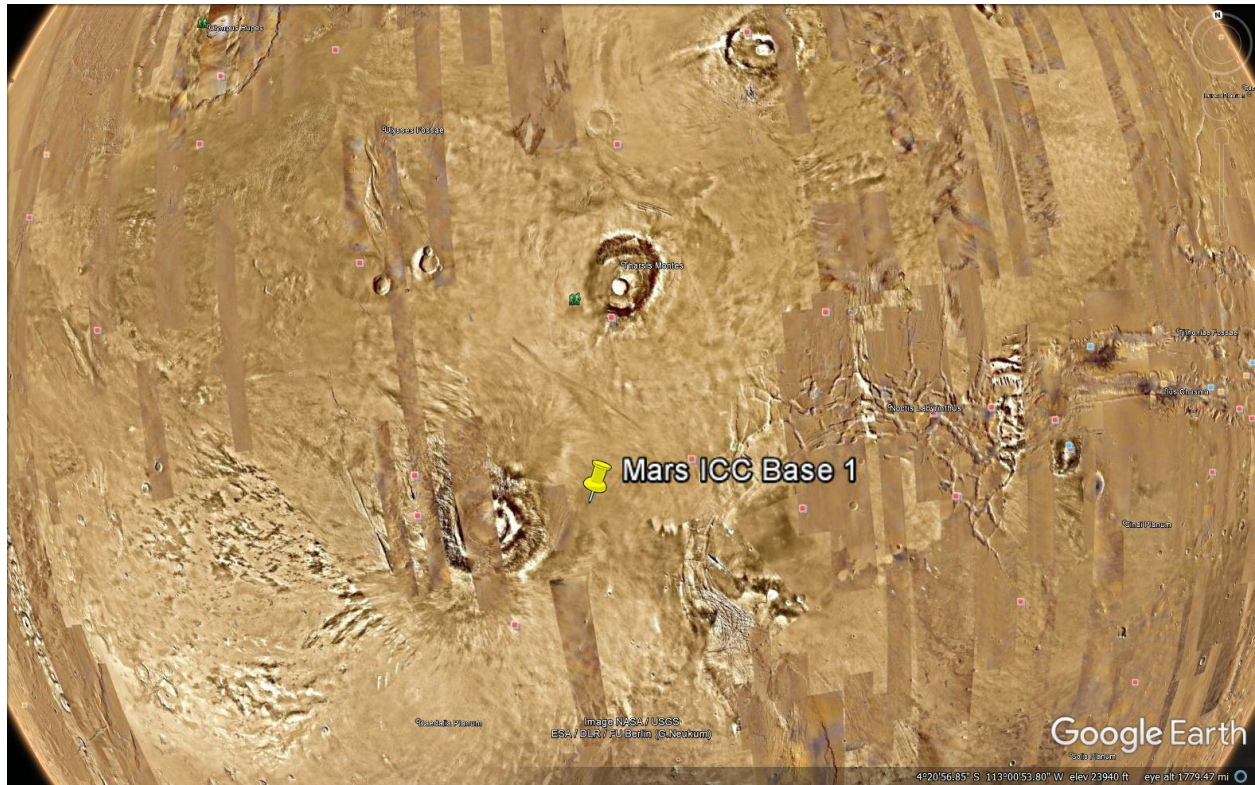

The EAK subject has a photographic memory and advanced remote viewing abilities so the memory recall retrieval of the Mars and Moon base geographical locations was accurate in terms of 85 % - 95 % in accuracy rates. The ACIO agent said that these base locations are legitimately accurate and he received copies of the exact same images as are shown in the below data.

Below are the images of the various ICC Mars and SSP Moon base geographical locations that the EAK subject was able to compile through using Google Earth:
